

Spark of Life Name Memory Aid

Remembering people's names can be a challenge for anyone at any time - yet knowing someone's name is a natural catalyst for spontaneous conversation.

When you wear a personalised Name Memory Aid, you give a person with dementia the opportunity to address you by your name and initiate a conversation.

Dementia Care International's Name Memory Aids were developed from over 18 months of research, trials and testing. They have proven to enable even people with low vision to read the name.

As a family member or friend of a person with dementia, can you imagine the joy of hearing your name spoken by them again?

Please note! For health professionals, the Name Memory Aid needs to be worn in addition to their official identification badge.

Example: C O L L E E N

Clip/Pin back Magnet back

Name 1:

Clip/Pin back Magnet back

Name 2:

Clip/Pin back Magnet back

Name 3:

Clip/Pin back Magnet back
